- TBC100 - Fixed Seat Height
- TBC100H - Adjustable Handles
- TBC100S - Adjustable Seat Height
- TBC100X - Adjustable Handles & Seat Height

MAGNUM PRO 5000 SERIES

> POWER AND STYLE

follow the lead

Thirty plus years of industry experience, innovation, and customer feedback result in aesthetics that draw users into exercise. Exceptional durability coupled with biomechanical expertise have been the trade marks of Magnum over the past three decades. The 5000 Series from Magnum will be as successful for your clients as it will be for your facility.

> A Integrated Biangular Technology enhances the weight lifting experience through lifting patterns that are smooth, controlled, and comfortable. Your clients will feel and enjoy the Biangular difference immediately, resulting in their retention and loyalty.

> B Weight stacks are positioned for optimal accessibility, creating smooth approachable lines in the 5000 Series.

> C Easy to reach and use supplemental resistance, range of motion controls, and easy glide pad adjustments all contribute to the ultimate user experience.

> D Full color exercise instructions are clearly visible and easy to read from the exercise position, reducing one more of the intimidating factors for novice users.

> Large round bent tubing is beautifully blended together into an alluring low profile with fully guarded pulleys and full rear shrouds to complete the nonintimidating appearance that draws users to each machine.

> Thirty plus years of experience and user feedback have assisted Magnum in developing the most user friendly, exceptionally durable, irresistible series of strength equipment on the market.

Biangular Technology

Magnum's patented mechanism creates perfect form through multi-joint and multi-plane movement patterns. The Magnum Biangular mechanism is nothing less than a fitness revolution. Biangular is the safest, most effective multi-motion movement because it is controlled, fluid, and biomechanically sound.

Magnum's innovative tradition carries on with the Pro Series Olympic benches, including our patented BREAKER Bench technology. Breaker benches allow the user to pivot the uprights of the bench forward, placing the bar in their position of power to lift (break) the bar from the uprights without external rotation of their shoulders.

PRO EXPANDABLE 900 Series TOWER SYSTEM

This three stack depiction is an actual photograph to give you a better visual of the construction of the Pro 900 Towers. This system is made up of a 921 Lat Pulldown, 947 Bicep / Tricep and a 926 Low Row. You can see how they are coupled together near the top and bottom of each frame. All Pro 900 units are constructed of 3" round steel tubing. The coupler system allows the machines to be manipulated into a straight line, angled line (as pictured) or even moved into a triangle as pictured on page 33, 900ETS3. This system allows you to configure whatever you want.

UNITS INCLUDED

900ETS3

- 921 Lat Pulldown
- 947 Bicep / Tricep
- 926 Low Row

APPROXIMATE FLOOR SPACE
180" W x 90" D x 92" H

The Pro 900 Expandable Tower section of this catalog is done with Solid Works drawings from our CAD department so we can depict several variations of this system.

UNITS INCLUDED

900ETS4

- 923 Adjustable Pulley
- 947 Bicep / Tricep
- 946 Lat Pulldown / Low Row
- DP921 Dual Pulley Lat Pulldown

APPROXIMATE FLOOR SPACE
130" W x 120" D x 92" H

PRO EXPANDABLE 900 *Series* TOWER SYSTEM

UNITS INCLUDED

900ETS8 with Cross Over

- 924 Cross Over
- 921 Lat Pulldown
- DP921 Dual Pulley Lat Pulldown
- 926 Low Row
- DP926 Dual Pulley Low Row
- 947 Bicep / Tricep
- DP923 Dual Adjustable Pulley

APPROXIMATE FLOOR SPACE
260" W x 170" D x 92" H

The Pro 900 Expandable Tower System currently offers 24 different stations to choose from. The multi-stack configurations in this section are presented strictly to give some ideas of how you can configure your choice of machines. Each of these 24 stations are truly modular and can be configured any way you like, to fit your space and budget.

Please contact a Magnum representative to help you build the Expandable Tower System that fits your space and budget. Everyone on our team is a professional, experienced in guiding your equipment choices and layout. The Pro 900 Expandable Tower stations connect to one another with a unique patent pending coupler system that provides more options than can be pictured in this catalog.

PRO EXPANDABLE 900 Series TOWER SYSTEM

UNITS INCLUDED

900ETS6 with Cross Over

- 924 Cross Over
- 921 Lat Pulldown
- 926 Low Row
- 942 Tricep Pushdown
- 946 Lat Pulldown / Low Row

APPROXIMATE FLOOR SPACE
240" W x 160" D x 92" H

UNITS INCLUDED

900ETS6

- 946 Lat Pulldown / Low Row
- 921 Lat Pulldown
- DP926 Dual Pulley Low Row
- DP921 Dual Pulley Lat Pulldown
- 923 Adjustable Pulley
- 947 Bicep / Tricep

APPROXIMATE FLOOR SPACE
180" W x 140" D x 92" H

UNITS INCLUDED

900ETS5

- 947 Bicep / Tricep
- 946 Lat Pulldown / Low Row
- 926 Low Row
- 921 Lat Pulldown
- 923 Adjustable Pulley

APPROXIMATE FLOOR SPACE

VARSITY **6000 Series** **DUAL MACHINES**

Thirty plus years of experience has given Magnum the expertise to design this line of compact value engineered dual function machines that out performs any others on the market. Users of any experience level will appreciate the quality workout Varsity Duals deliver. Their design provides a less intimidating appearance that complements any facility and draws users in to exercise. The eight units that make up the Varsity Duals actually allow users to perform over 20 different exercises in a very limited amount of floor space while fitting into any budget.

Varsity **800 Series EX-** **PANDABLE TOWER**

The Varsity 800 Expandable Tower System is a great example of Magnum's value engineering capabilities. There are 10 different stations that can be combined any way you choose. The following five examples are presented strictly to give you a visual concept. A Magnum representative can help you put together a system that fits your needs, space, and budget. Seven of the ten stations can be purchased as Free Standing Machines that can be expanded in the future. The D842 Tricep Pushdown, D823 Adjustable Pulley, and DP823 Dual Adjustable Pulley can only be purchased as part of the multi-stack units.

Magnum DuraRoll is designed specifically for fitness applications where heavy use and abuse are common for floor surfaces. Magnum uses state of the art technology to blend the highest quality recycled rubber into rolled flooring that is comfortable, safe, and durable. Simple, low cost installation with minimal waste make Magnum DuraRoll the most practical and economically sound flooring choice for fitness and recreational applications.

Primary Flooring: The wide variety of colors, color combinations and intensity options allow you to coordinate your flooring with equipment, furnishings, and overall decorative design. Your options are limitless. Bring your imagination.

Standard Roll Dimensions: 4' wide, 1/4", 3/8", or 1/2" thick cut to custom lengths.

Seven Standard Colors: Black, Egg Shell, Blue, Red, Tan, Gray, and Green.

Five Optional Colors: Yellow, Teal, Purple, Orange, and Raspberry. **Percentage Fleck:** Color flecks can be added in 10, 15, and 20 percent. **Optional Color Combinations:** Any two or three color flecks can be blended together to create unique color combinations.

Interlocking Tiles

Center

Border

Corner

Interlocking DuraTiles 3/8" x 36" x 36" that are available in corner, border, and center pieces. They come in solid black or 10% color fleck of blue, tan, and gray. This great flooring alternative enables you to install a rubber floor by yourself. Loosely lay these interlocking tiles without using glue or tape. Individual tiles can be replaced or flipped over if worn or damaged. State of the art technology is used to blend the highest quality recycled rubber into DuraTiles creating a comfortable, safe, and durable rubber floor option that is perfect for any fitness or recreational application.

Deco Tiles

100% color provides you with design options that will set your facility apart from the competition. Create walkways, borders, or insert geometric shapes to accent any area. Deco Tiles are 3/8" thick by 36" square. They can be cut in the field into smaller squares, triangles, or chevrons and interlocked to accent any room.

Logo Tiles

SymbolTiles with 95% color can be used to enhance your facilities identity. These water jet cut outs do not need to be limited to facility logos. They can be any type of design or symbol that fits your needs.

WEIGHTS, BARS & ACCESSORIES

Magnum offers a whole new world in Strength Accessories. Our products are manufactured to precise specifications resulting in an aesthetically contemporary appearance with a full complement of features making them durable, cost effective, and a pleasure to use.

Sure-Grip Olympic plates are encased in a Black Virgin Rubber coating. Olympic bars are fashioned with 30mm fatigue proof bars available with an extra durable industrial hard chrome finish.
